

PULL-PAK® - 5 MINI-SPOOLS

PULL-PAK® - THE EASY WAY TO SELECT THE EXACT LENGTH OF TUBING NEEDED

A large selection of all purpose, highly flexible, heat shrink tubing
Made from high performance Polyvinylchloride (PVC) polymers

FEATURES

- Polyvinylchloride (PVC) HS-105 for general-purpose insulation, strain relief, protection and bundling applications
- 2:1 shrink ratio
- The most widely used diameter sizes: 1/16", 1/8", 3/16", 1/4", 3/8"
- Refill mini-spools are available
- Low shrink temperature
- Engineered for total compatibility with PVC jacketed wire and cable
- Highly flame retardant
- Resists many chemicals, oils, UV light, fungus, moisture, salt water
- Packaged in a lightweight, portable dispenser that easily attaches to a workbench, table top or wall
- Meets UL, CSA and Military Specifications

USES

- Maintenance and repair departments
- Shop floor, workbench or service repair truck applications
- Service technicians and mechanics
- Engineering departments
- R & D labs
- Prototypes
- Low volume end users
